

## Using The Smart Notebook Document Writer Print Option

The Smart Notebook software installs a printer option called the Smart Notebook Document Writer. You will find this printer as an option in your printer dialog box when you choose to print a document. If you have a document that you would like to use with your SMART Board, then printing the document to this printer option will allow you to interact with the document within the Notebook software. This printer option will essentially create a Notebook file of your document and will launch the Notebook program for you.

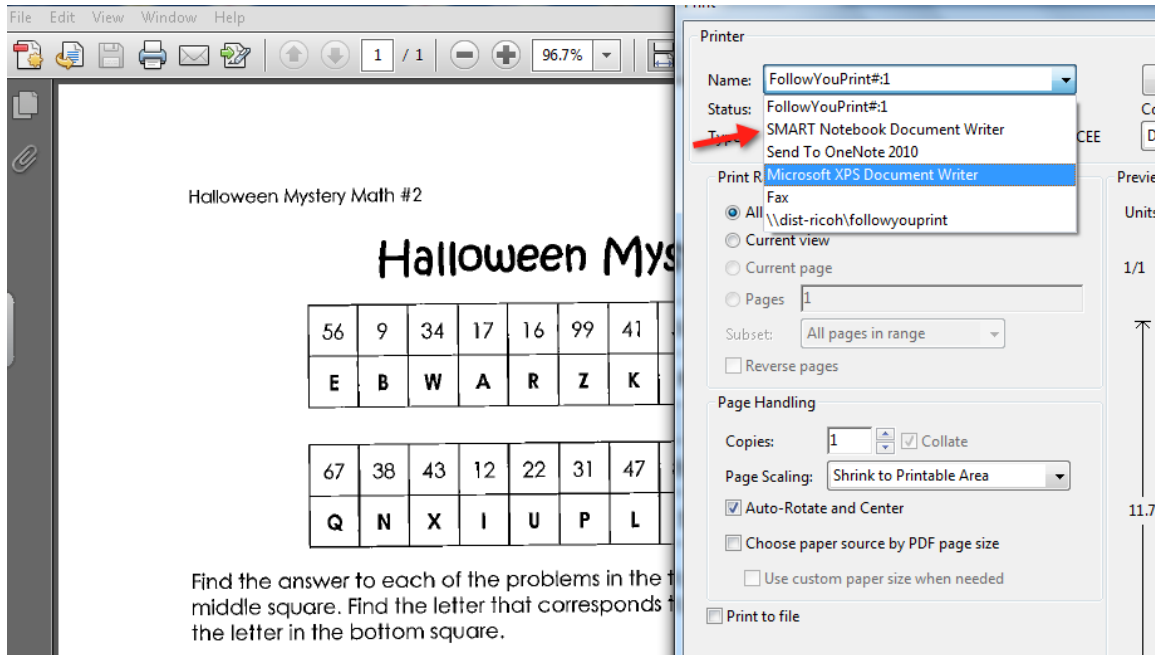

Please refer the below illustrations for more clarity. If you have questions, you can contact Dana Walker or Lisa Rock.

Choose file, then print, then select the Smart Notebook Document Writer printer.

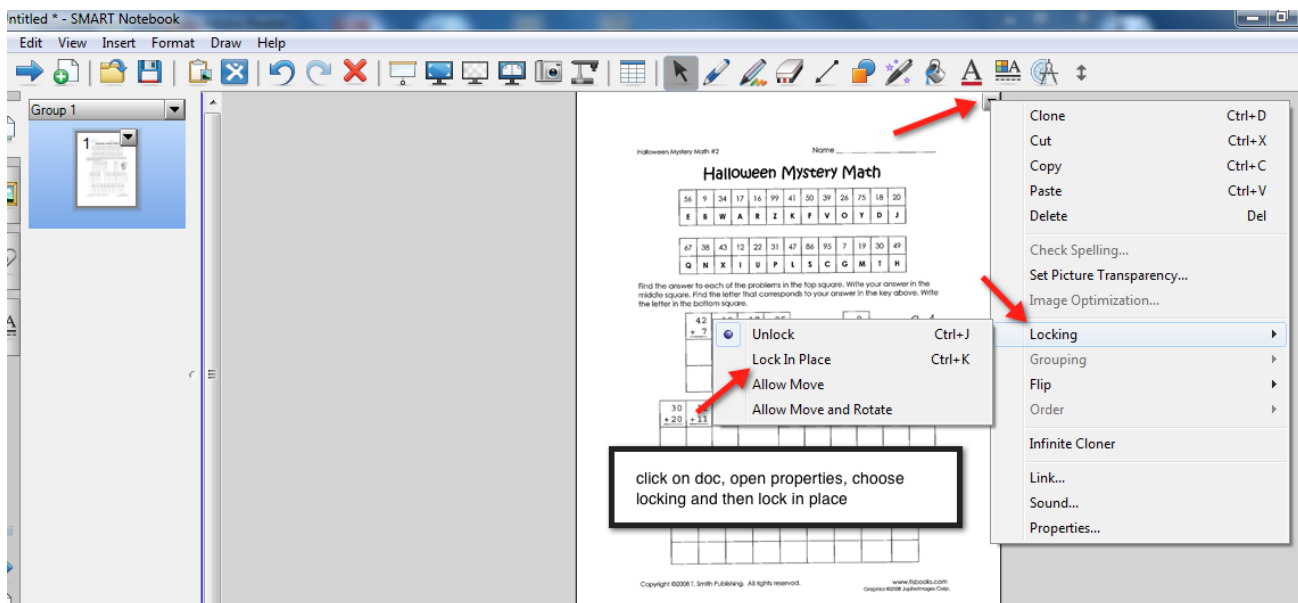

## Using The Smart Notebook Document Writer Print Option

In this example, we opened a pdf file which is a math worksheet. We want to have the students will in the answers to solve the puzzle by coming up to the smartboard and using the pens. All we have to do it print this pdf to the Smart Notebook Document Writer printer option.

The document will now open in the Notebook software as a .notebook file. You will need to lock it in place so that you can write on it.
